

11TH Class computer Notes

Solved Exercise

1) Tick the Correct Option: (All questions / options - 250 / 0) 0 Marks 1) Read and write memory of computer is:

a) Cache	b) RAM	c) ROM	d) Register
----------	--------	--------	-------------

Correct Answer
RAM

2) The shape of insertion point symbol is:

a) Arrow	b) Vertical line	c) Horizontal line	d) Large circle
----------	------------------	--------------------	-----------------

Correct Answer
Vertical line

3) For the custom format 0000, the value 15 will appear an:

a) 15.00	b) 0015	c) 015.0	d) 00.15
----------	---------	----------	----------

Correct Answer
0015

4) Which is not a cause of virus?

a) E-mail	b) Network	c) Un-Pirated software	d) Logic bomb
-----------	------------	------------------------	---------------

Correct Answer
Un-Pirated software

5) Data communication signals can be:

a) Analog	b) Digital	c) Both a & b	d) None of these
-----------	------------	---------------	------------------

Correct Answer
Both a & b

6) A telephone line is an example of:

a) Simplex mode	b) Half-duplex	c) Full duplex	d) None of these
-----------------	----------------	----------------	------------------

Correct Answer
Full duplex

7) FTP facility is used to:

a) Transfer protocol	b) Transfer file	c) Connect to the internet	d) Check PC
----------------------	------------------	----------------------------	-------------

Correct Answer
Transfer file

8) The default alignment of text and number in a cell is:

a) Bottom	b) Top	c) Right	d) Left
-----------	--------	----------	---------

Correct Answer
Left

9) Which is based on NT technology?

a) Window 2000	b) Window 98	c) Window 3.1	d) Window 95
----------------	--------------	---------------	--------------

Correct Answer
Window 2000

10) Numeric data can be:

a) Positive	b) Negative	c) Both a & b	d) None of these
-------------	-------------	---------------	------------------

Correct Answer
Both a & b

11) Which of the following device is used to receive the sound output?

a) Plotters	b) Microphone	c) Speaker	d) Monitor
-------------	---------------	------------	------------

Correct Answer
Speaker

12) The height of weight withing a given period of time is known as:

a) Frequency	b) Amplitude	c) Oscillation	d) Pulse
--------------	--------------	----------------	----------

Correct Answer
Amplitude

13) To get the lowest number, function is:

a) =low(A10:A20)	b) =lowest(A10:A20)	c) =min(A10:A20)	d) =minimum(A10:A20)
------------------	---------------------	------------------	----------------------

Correct Answer
=min(A10:A20)

14) Which of the following is invalid relative reference of a cell?

a) 44BC	b) B5	c) CD 45	d) IM40
---------	-------	----------	---------

Correct Answer
44BC

15) One kilobyte is exactly:

a) 1 byte	b) 100 bytes	c) 256 bytes	d) 1024 bytes
-----------	--------------	--------------	---------------

Correct Answer
1024 bytes

16) The circuit board that connects the monitor to computer is called:

a) Video Adapter	b) Monitor link	c) Digital Cable	d) Monitor Adapter
------------------	-----------------	------------------	--------------------

Correct Answer
Video Adapter

17) File can exist in folder but folders cannot exists in:

a) Path	b) Files	c) Folders	d) Documents
---------	----------	------------	--------------

Correct Answer
Files

18) Analog signal is measured in:

a) Hertz	b) Bit	c) Volts	d) None of these
----------	--------	----------	------------------

Correct Answer
Volts

19) Device automatically detected by windows are called:

a) Plug & play	b) Installed	c) Serial	d) Automatic
----------------	--------------	-----------	--------------

Correct Answer
Plug & play

20) Calling cells by address such as 'B2' is called:

a) Absolute referencing	b) Adjacent referencing	c) Relative referencing	d) Calling method
-------------------------	-------------------------	-------------------------	-------------------

Correct Answer
Absolute referencing

21) Hardware is best describe as:

a) Physical parts	b) Printed copy files	c) A program	d) Logic part
-------------------	-----------------------	--------------	---------------

Correct Answer
Physical parts

22) A location inside a CPU where it can hold data temporarily while processing is called:

a) Memory	b) Cache	c) Flag	d) Register
-----------	----------	---------	-------------

Correct Answer
Register

23) The step that performs the actions given in the instruction is:

a) Fetch	b) Calculate	c) Decide	d) Execute
----------	--------------	-----------	------------

Correct Answer
Execute

24) Which of the following is top level domain?

a) HTTP	b) .com	c) HTML	d) URL
---------	---------	---------	--------

Correct Answer
.com

25) In _____ transmission mode, data flows in both directions at the same time:

a) Simplex	b) Half-duplex	c) Full-duplex	d) Duplex
------------	----------------	----------------	-----------

Correct Answer
Full-duplex

26) The process of getting instruction from main memory by CPU is:

a) Data fetch	b) Instruction fetch	c) Decode	d) None of these
---------------	----------------------	-----------	------------------

Correct Answer
Instruction fetch

27) Harmful for computer is:

a) Antivirus	b) Virus	c) Software	d) Freeware
--------------	----------	-------------	-------------

Correct Answer
Virus

28) Which protocol is used to access web pages on World Wide Web?

a) TCP/IP	b) GOPHER	c) HTTP	d) HTML
-----------	-----------	---------	---------

Correct Answer
HTTP

29) Which of the following is the mode of transmission?

a) Half-duplex	b) Full-duplex	c) Simplex	d) Duplex
----------------	----------------	------------	-----------

Correct Answer
Full-duplex

30) Data consists of digits from 0-9 is called:

a) Text data	b) Numeric data	c) Video data	d) Image data
--------------	-----------------	---------------	---------------

Correct Answer
Numeric data

31) DPI stands for:

a) Dot per inch	b) Decimal per inch	c) Digit per inch	d) Data per inch
-----------------	---------------------	-------------------	------------------

Correct Answer
Dot per inch

32) Which of the following function returns the highest number:

a) =maximum (A5:A20)	b) =maximum(A5:20A)	c) =max(A5:A20)	d) =maxi(A5:A20)
----------------------	---------------------	-----------------	------------------

Correct Answer
=max(A5:A20)

33) An ink-jet printer is an example of an:

a) Laser printer b) Impact printer c) COM printer d) Non-impact printer

Correct Answer
Non-impact printer

34) The microphone converts the sound into:

a) Mechanical signals	b) Electrical signals	c) Computer file	d) Software
-----------------------	-----------------------	------------------	-------------

Correct Answer
Electrical signals

35) How many type of addressing scheme?

a) 3	b) 2	c) 5	d) 8
------	------	------	------

Correct Answer

2

36) An organized set of related components is called:

a) SDLC	b) Network	c) Processing	d) System
---------	------------	---------------	-----------

Correct Answer
System

37) Orientation of the contents of a cell can be set up to:

a) 45 degrees	b) 90 degrees	c) 180 degrees	d) 25 degrees
---------------	---------------	----------------	---------------

Correct Answer
90 degrees

38) The internal transfer of data in a computer uses:

a) Parallel mode	b) Serial mode	c) Both a & b	d) None of these
------------------	----------------	---------------	------------------

Correct Answer
Parallel mode

39) McAfee is a/an:

a) Virus	b) Antivirus	c) Hacker	d) Worm
----------	--------------	-----------	---------

Correct Answer
Antivirus

40) Capacity of RAM can be:

a) 256 MB	b) 512 MB	c) 1 GB	d) All of above
-----------	-----------	---------	-----------------

Correct Answer
All of above

41) The function of CPU, it is called;

a) Fetch	b) Decode	c) Execute	d) All of these
----------	-----------	------------	-----------------

Correct Answer
All of these

42) The number of times wave repeats during specific time interval is called:

a) Pulse	b) Amplitude	c) Frequency	d) Oscillation
----------	--------------	--------------	----------------

Correct Answer
Frequency

43) Transferring information from computer to internet is called:

a) Downloading	b) Down seizing	c) Uploading	d) Pasting
----------------	-----------------	--------------	------------

Correct Answer
Uploading

44) To view and apply functions available in Excel:

a) Function wizard	b) Function Tool bar	c) Function dialog box	d) All of above
--------------------	----------------------	------------------------	-----------------

Correct Answer
All of above

45) All are the types of band width except:

a) Base-band	b) Broadband	c) Narrowband	d) Rubber-band
--------------	--------------	---------------	----------------

Correct Answer
Rubber-band

46) Following are the features of operating system except:

a) GUI	b) Command prompt	c) Processor management	d) DBMS
--------	-------------------	-------------------------	---------

Correct Answer
DBMS

47) The World Wide Web was introduced in:

a) 1960	b) 1970	c) 1989	d) 2000
---------	---------	---------	---------

Correct Answer
1989

48) The group of 8 bit is called:

a) Byte	b) Nibble	c) KB	d) GB
---------	-----------	-------	-------

Correct Answer
Byte

49) The program that contains instruction to operate a device is called:

a) Device driver	b) Device operator	c) Device linking	d) Device system
------------------	--------------------	-------------------	------------------

Correct Answer
Device driver

50) How many types of network standard are there:

a) 2	b) 4	c) 6	d) 8
------	------	------	------

Correct Answer
2

51) The maximum number of partition that can be created on disk is:

a) 2	b) 3	c) 4	d) 10
------	------	------	-------

Correct Answer
4

52) _____ code is a 7-bits or 8-bit code:

a) BCD	b) EBCDIC	c) ASCII	d) None of these
--------	-----------	----------	------------------

Correct Answer
ASCII

53) Which is current measurement of a modem's data transfer rate:

a) Kbps	b) Gbps	c) Bps	d) Mbps
---------	---------	--------	---------

Correct Answer
Mbps

54) Software to peruse the internet is called:

a) Gateway	b) Browser	c) FET	d) Tele conferencing
------------	------------	--------	----------------------

Correct Answer
Browser

55) Type of RAM which need not to be refreshed:

a) SRAM	b) DRAM	c) PRAM	d) None of these
---------	---------	---------	------------------

Correct Answer
SRAM

56) The most widely used web protocol:

a) HTTP	b) HTML	c) URL	d) ISP
---------	---------	--------	--------

Correct Answer
HTTP

57) ROM stands for:

a) Read of Memory	b) Reader Online Memory	c) Read Only Memory	d) Request on Memory
-------------------	-------------------------	---------------------	----------------------

Correct Answer
Read Only Memory

58) Communication between a computer and keyboard involves:

a) Simplex	b) Half-duplex	c) Full-duplex	d) All of these
------------	----------------	----------------	-----------------

Correct Answer
Simplex

59) For the custom format #,###, the value 2500 will appear as:

a) 2500.00	b) 2500.000	c) 2500	d) 250.0
------------	-------------	---------	----------

Correct Answer
2500

60) MS windows is an example of operating system with _____ interface:

a) CLI	b) GUI	c) SUI	d) MUI
--------	--------	--------	--------

Correct Answer
GUI

61) Which of the following is not considered to be peripheral device?

a) Disk drive	b) Keyboard	c) Monitor	d) CPU
---------------	-------------	------------	--------

Correct Answer
CPU

62) The fly-by wire system is used in:

a) Twisted cable	b) Airline system	c) Cable in air	d) None of these
------------------	-------------------	-----------------	------------------

Correct Answer
Airline system

63) How many data communications modes are?

a) 2	b) 4	c) 3	d) 6
------	------	------	------

Correct Answer
3

64) CBT stands for:

a) Computer Based Trade	b) Computer Based Training	c) Certificate Based Training	d) None of these
-------------------------	----------------------------	-------------------------------	------------------

Correct Answer

Computer Based Training

65) All are guided media except:

a) Fiber optic	b) Microwave	c) Coaxial	d) Twisted pair
----------------	--------------	------------	-----------------

Correct Answer

Microwave

66) Which of the following is a spreadsheet?

a) MS Word	b) MS Excel	c) MS Power point	d) Both b and a
------------	-------------	-------------------	-----------------

Correct Answer

MS Excel

67) Which of the following is an absolute address?

a) A1	b) A1\$	c) A\$1\$	d) None of above
-------	---------	-----------	------------------

Correct Answer

A\$1\$

68) How many characters ASCII 7-bit code can represent?

a) 128	b) 256	c) 500	d) 364
--------	--------	--------	--------

Correct Answer

128

69) For the custom format ##,000,the number 242.59 will appear as:

a) 242.59000	b) 24.2590	c) 242.59	d) None
--------------	------------	-----------	---------

Correct Answer

None

70) Which of the following feature is provided with modem?

a) Speed	b) Self-testing	c) Transmission rate	d) All of these
----------	-----------------	----------------------	-----------------

Correct Answer

All of these

71) Which of the following is non-volatile:

a) PROM	b) EPROM	c) Both a & b	d) None of these
---------	----------	---------------	------------------

Correct Answer

Both a & b

72) The length of IP Address is:

a) 8 bits	b) 16 bits	c) 32 bits	d) 64 bits
-----------	------------	------------	------------

Correct Answer

32 bits

73) BIT stands for:

a) Binary Integer	b) Binary Digit	c) Binary Interval	d) None of these
-------------------	-----------------	--------------------	------------------

Correct Answer
Binary Digit

74) All are the examples of operating system except:

a) DOS	b) MS-Windows	c) Unix	d) C++
--------	---------------	---------	--------

Correct Answer
C++

75) Modem is combination of:

a) Modulator/De modulator	b) Base Band	c) Mouse/Demand	d) None of these
---------------------------	--------------	-----------------	------------------

Correct Answer
Modulator/De modulator

76) The average of cell C10 to C40 can be calculated using function:

a) =Avge(C10:C40)	b) =Avge(10C:C40)	c) =Aveg(C10:C40)	d) =Average(C10:C40)
-------------------	-------------------	-------------------	----------------------

Correct Answer
=Average(C10:C40)

77) The physical layout of LAN is known as:

a) Topology	b) Session	c) Link	d) Connector
-------------	------------	---------	--------------

Correct Answer
Topology

78) Copying data from internet to computer is called:

a) Uploading	b) Downloading	c) Transferring	d) None of these
--------------	----------------	-----------------	------------------

Correct Answer
Downloading

79) Which of the following transmits voice and data through air as high-frequency radio waves?

a) Twisted pair	b) Coaxial cable	c) Fiber-optic cable	d) Microwave
-----------------	------------------	----------------------	--------------

Correct Answer
Microwave

80) A collection of computer connected together is called:

a) Processing	b) Network	c) Chatting	d) Centralized system
---------------	------------	-------------	-----------------------

Correct Answer
Network

81) SRAM is used to built _____ inside processor:

a) Register	b) Cache	c) DDR	d) ROM
-------------	----------	--------	--------

Correct Answer
Cache

82) Which of the following device used the parallel transmission?

a) Mouse	b) Keyboard	c) Printer	d) Light pen
----------	-------------	------------	--------------

Correct Answer
Printer

83) RAM is the abbreviation for:

a) Random Access Memory	b) Read Access Memory	c) Read Allow Memory	d) Random Allow Memory
-------------------------	-----------------------	----------------------	------------------------

Correct Answer

Random Access Memory

84) In microwave system, towers of antennas must be:

a) Straight line	b) Line of sight	c) At different places	d) None of these
------------------	------------------	------------------------	------------------

Correct Answer

Line of sight

85) Type of a application software are:

a) 5	b) 3	c) 4	d) 2
------	------	------	------

Correct Answer

2

86) From which menu header and footer option can be used is word:

a) Tools	b) Insert	c) Edit	d) View
----------	-----------	---------	---------

Correct Answer

View

87) A device used for optical character recognition is a:

a) Wand reader	b) Cursor	c) Pen	d) MICR reader
----------------	-----------	--------	----------------

Correct Answer

Wand reader

88) The output of compiler is called:

a) Source code	b) Object code	c) Unicode	d) None of these
----------------	----------------	------------	------------------

Correct Answer

Object code

89) A _____ is an automatic programmable machine:

a) CAD	b) CAM	c) CBT	d) Robot
--------	--------	--------	----------

Correct Answer

Robot

90) The set of programs running in the background on a computer:

a) Application package	b) Operating system	c) Language program	d) Translators
------------------------	---------------------	---------------------	----------------

Correct Answer

Operating system

91) A word processor can be used to:

a) Write text	b) Edit text	c) Print text	d) All of above
---------------	--------------	---------------	-----------------

Correct Answer

All of above

92) Which of the following is an impact printer?

a) Laser printer	b) Dot-Matrix printer	c) COM printer	d) Inkjet printer
------------------	-----------------------	----------------	-------------------

Correct Answer
Dot-Matrix printer

93) Words, sentences and paragraphs are example of:

a) Image data	b) Numeric data	c) Sound data	d) Text data
---------------	-----------------	---------------	--------------

Correct Answer
Text data

94) A data bus with 32 lines can transfer which data at a time:

a) 32 bit	b) 32 bytes	c) 4 bytes	d) Both a & c
-----------	-------------	------------	---------------

Correct Answer
Both a & c

95) The right of person to keep his information away from others is called:

a) Privacy	b) Private	c) Secrecy	d) Right
------------	------------	------------	----------

Correct Answer
Privacy

96) Which of the following is an example of operating system:

a) MS-Word	b) MS-Excel	c) MS-Power point	d) MS-Windows
------------	-------------	-------------------	---------------

Correct Answer
MS-Windows

97) Windows is the most popular product of:

a) Sun System	b) Microsoft	c) Hewlett	d) ANSI
---------------	--------------	------------	---------

Correct Answer
Microsoft

98) A process of encoding for the purpose of data security is called:

a) Privacy	b) Private	c) Secrecy	d) Right
------------	------------	------------	----------

Correct Answer
Privacy

99) Which component is used to connect different parts of computer together?

a) Bus Interconncetion	b) Control unit	c) Main memory	d) None of these
------------------------	-----------------	----------------	------------------

Correct Answer
Bus Interconncetion

100) Data and programs not being used by computer are stored in:

a) Secondary storage	b) Cache	c) Primary storage	d) Printer
----------------------	----------	--------------------	------------

Correct Answer
Secondary storage

101) The function count() only counts the:

a) Non empty cells	b) Empty cells	c) Labels	d) Values
--------------------	----------------	-----------	-----------

Correct Answer
Non empty cells

102) Modern computer can perform calculations or process at:

a) Per second	b) Per minute	c) Nino second	d) All of these
---------------	---------------	----------------	-----------------

Correct Answer

All of these

103) Many products are designed by using:

a) ATM	b) ROBOT	c) CAD	d) CAM
--------	----------	--------	--------

Correct Answer

CAD

104) When data is transmitted block by block, it is called:

a) Asynchronous	b) Synchronous	c) Simplex	d) Serial
-----------------	----------------	------------	-----------

Correct Answer

Synchronous

105) Which of the following is the first phase of SDLC?

a) Design	b) Coding	c) Preliminary investigation	d) Analysis
-----------	-----------	------------------------------	-------------

Correct Answer

Preliminary investigation

106) Deleting a character to the left of the cursor is accomplished by passing the:

a) Del key	b) Backspace key	c) Home key	d) Ctrl+Tab
------------	------------------	-------------	-------------

Correct Answer

Backspace key

107) The instruction that performs addition, subtraction etc. is called:

a) Arithmetic instructions	b) Logical instruction	c) I/O instructions	d) None of these
----------------------------	------------------------	---------------------	------------------

Correct Answer

Arithmetic instructions

108) Smaller unit of memory is:

a) Byte	b) Bit	c) Word	d) None of these
---------	--------	---------	------------------

Correct Answer

Bit

109) A set of programs that run the computer are:

a) Hardware	b) Document	c) Hard Disk	d) Software
-------------	-------------	--------------	-------------

Correct Answer

Software

110) Which is not network communication device?

a) Router	b) Hub	c) LAN	d) NIC
-----------	--------	--------	--------

Correct Answer

LAN

111) In _____ transmission mode, data flows in both directions but not simultaneously:

a) Simplex	b) Half-duplex	c) Full-duplex	d) Duplex
------------	----------------	----------------	-----------

Correct Answer
Half-duplex

112) To present data entered in to the worksheet in visual format:

a) Graph	b) Chart	c) Picture	d) Diagram
----------	----------	------------	------------

Correct Answer
Chart

113) Laser printer is an example of:

a) Non-Impact	b) Inkjet	c) Impact	d) Dot matrix
---------------	-----------	-----------	---------------

Correct Answer
Non-Impact

114) The example of antivirus is:

a) McAfee	b) Trojan horse	c) Worm	d) Logic bomb
-----------	-----------------	---------	---------------

Correct Answer
McAfee

115) A network that transmits data over city wide distances faster than LAN is:

a) WAN	b) LAN	c) MAN	d) NAN
--------	--------	--------	--------

Correct Answer
MAN

116) Computer based weather forecasting depends on accurate collection of data from:

a) Television	b) Weather stations	c) Radar	d) Antenna
---------------	---------------------	----------	------------

Correct Answer
Weather stations

117) Start/Stop bits are not required in the transmission:

a) Parallel	b) Serial	c) Synchronous	d) Asynchronous
-------------	-----------	----------------	-----------------

Correct Answer
Synchronous

118) This type of bus connects the CPU to memory on the system board:

a) System Bus	b) Word Bus	c) Expansion Bus	d) Width Bus
---------------	-------------	------------------	--------------

Correct Answer
System Bus

119) A collection of computers, connected together is called:

a) Processing	b) Network	c) Chatting	d) Centralized system
---------------	------------	-------------	-----------------------

Correct Answer
Network

120) All of following are top level domain except:

a) .edu b) .org c) .gov d) .bus

Correct Answer
.bus

121) Which of the following is not type of chart?

a) xy	b) Pie	c) Line	d) Bar
-------	--------	---------	--------

Correct Answer
xy

122) Which of the following protocol is used to access internet?

a) Ethernet	b) ARC net	c) TCP/IP	d) DSL
-------------	------------	-----------	--------

Correct Answer
TCP/IP

123) The process of transferring data electronically from one place to another is called:

a) Data processing	b) Data sender	c) Data communication	d) Data sequencing
--------------------	----------------	-----------------------	--------------------

Correct Answer
Data communication

124) Chart wizard can be started by the command:

a) Format/chart	b) Insert/chart	c) View/chart	d) Tools/chart
-----------------	-----------------	---------------	----------------

Correct Answer
Insert/chart

125) Which is not biometric technique?

a) Badge	b) Retina	c) Face	d) Palm print
----------	-----------	---------	---------------

Correct Answer
Badge

126) The right to use the software on computer is called:

a) Software copyright	b) Site license	c) Software piracy	d) Software key
-----------------------	-----------------	--------------------	-----------------

Correct Answer
Software copyright

127) The set of rules of exchange data in a communication network is called:

a) Gateway	b) Procedure	c) Protocol	d) Token
------------	--------------	-------------	----------

Correct Answer
Protocol

128) Every instruction for CPU generally consist of _____ parts:

a) 2	b) 3	c) 4	d) 5
------	------	------	------

Correct Answer
2

129) OSI reference model has _____ layers:

a) 9	b) 8	c) 7	d) 6
------	------	------	------

Correct Answer
7

130) Data processing is also known as:

a) Accuracy	b) Computing	c) Speed	d) Merging
-------------	--------------	----------	------------

Correct Answer
Computing

131) By default values are aligned in a cell at:

a) Left	b) Top	c) Bottom	d) Right
---------	--------	-----------	----------

Correct Answer
Right

132) The device or computer which accept the data is called:

a) Medium	b) Receiver	c) Sender	d) Transmitter
-----------	-------------	-----------	----------------

Correct Answer
Receiver

133) Most applications of robotics are in which area?

a) Cooking	b) Manufacturing	c) Teaching	d) Farming
------------	------------------	-------------	------------

Correct Answer
Manufacturing

134) The coding scheme that represents upto 256 characters:

a) BCD	b) EBCDIC	c) ASCII	d) Unicode
--------	-----------	----------	------------

Correct Answer
ASCII

135) In microwave system, towers are placed at the distance of:

a) 10-20 miles	b) 20-25 miles	c) 20-30 miles	d) 20-35 miles
----------------	----------------	----------------	----------------

Correct Answer
20-30 miles

136) Data communication requires:

a) Sender	b) Receiver	c) Medium	d) All of these
-----------	-------------	-----------	-----------------

Correct Answer
All of these

137) Which of the following contains the administrative tools:

a) Control Panel	b) Start button	c) Internet Explorer	d) Recycle Bin
------------------	-----------------	----------------------	----------------

Correct Answer
Control Panel

138) Alignment of a value in a cell can be:

a) Left	b) Right	c) Centered	d) All of them
---------	----------	-------------	----------------

Correct Answer
All of them

139) Delecting a character to the left of the cursor is accomplished by pressing the:

a) Del key	b) Backspace key	c) Home key	d) Ctrl+Tab
------------	------------------	-------------	-------------

Correct Answer
Backspace key

140) An operating system is a:

a) System utility	b) Application software	c) System software	d) Software package
-------------------	-------------------------	--------------------	---------------------

Correct Answer
System software

141) Software to pursue to internet is:

a) Gateway	b) EFT	c) Browser	d) Teleconferencing
------------	--------	------------	---------------------

Correct Answer
Browser

142) The example of Defacto standard is:

a) SNA	b) ANSI	c) ISO	d) IEEE
--------	---------	--------	---------

Correct Answer
SNA

143) The function in Excel begins with:

a) +	b) #	c) /	d) =
------	------	------	------

Correct Answer
=

144) If a computer uses a 32-bit internal structure, _____ bits data will be transferred:

a) 16	b) 32	c) 64	d) 128
-------	-------	-------	--------

Correct Answer
32

145) The standard protocol for internet is:

a) TCP	b) IP address	c) IP protocol	d) TCP/IP
--------	---------------	----------------	-----------

Correct Answer
TCP/IP

146) The part of computer system that executes the instruction is:

a) CPU	b) RAM	c) Mother board	d) System unit
--------	--------	-----------------	----------------

Correct Answer
CPU

147) The keyboard format that is most commonly used is the:

a) QWERTY	b) AZERTY	c) DVORAK	d) SPLITTER
-----------	-----------	-----------	-------------

Correct Answer
QWERTY

148) The chart, graph, picture and free hand drawing are examples of:

a) Image data	b) Audio data	c) Numeric data	d) Text data
---------------	---------------	-----------------	--------------

Correct Answer
Image data

149) A bus consist of:

a) Register	b) Accumulator	c) Set of parallel line	d) Computer Clock
-------------	----------------	-------------------------	-------------------

Correct Answer
Set of parallel line

150) _____ is not an output device?

a) Scanner	b) Printer	c) Monitor	d) Speaker
------------	------------	------------	------------

Correct Answer
Scanner

151) The memory which increases the performance of computer:

a) RAM	b) Cache	c) ROM	d) Hard Disk
--------	----------	--------	--------------

Correct Answer
Cache

152) Which of the following is an impact printer?

a) Dot Matrix	b) Daisy Wheel Printer	c) Line Printer	d) All of above
---------------	------------------------	-----------------	-----------------

Correct Answer
All of above

153) How many bits are there in one byte?

a) 1	b) 2	c) 4	d) 8
------	------	------	------

Correct Answer
8

154) The connction between telephone line and modem is:

a) Analog	b) Digital	c) Both a & b	d) None of these
-----------	------------	---------------	------------------

Correct Answer
Analog

155) All of the following are elements of data communication system except:

a) Sender	b) Receiver	c) Medium	d) Voltage
-----------	-------------	-----------	------------

Correct Answer
Voltage

156) Instructions written on _____ can be erased using ultraviolet rays:

a) PROM	b) EPROM	c) EEPROM	d) FEPROM
---------	----------	-----------	-----------

Correct Answer
EPROM

157) Another name of antivirus is:

a) Vaccine	b) Worm	c) Trojan horse	d) Hacker
------------	---------	-----------------	-----------

Correct Answer
Vaccine

158) The layer taht is used to control hpow a bit-stream of data is sent and received over physical media is called:

a) Application	b) Session	c) Transport	d) Physical
----------------	------------	--------------	-------------

Correct Answer

Physical

159) In _____ transmission mode, data flows only one direction:

a) Simplex	b) Half-duplex	c) Full-duplex	d) None of these
------------	----------------	----------------	------------------

Correct Answer

Simplex

160) Software that is used to detect and remove the viruses from computer is called:

a) Pirated software	b) Antivirus	c) Trojan horse	d) Virus
---------------------	--------------	-----------------	----------

Correct Answer

Antivirus

161) How many pair of computer can simultaneously communicate on Ethernet LAN?

a) 1	b) 2	c) 3	d) Multiple
------	------	------	-------------

Correct Answer

Multiple

162) Types of ROM that can be re-written by using electronic devices:

a) EEPROM	b) PROM	c) EPROM	d) RAM
-----------	---------	----------	--------

Correct Answer

EPROM

163) The electromagnetic or light waves representing data are called:

a) Information	b) Signal	c) Sender	d) Frequency
----------------	-----------	-----------	--------------

Correct Answer

Signal

164) The device which converts encoded analog data into digital form is:

a) Medium	b) Encoder	c) Decoder	d) Sink
-----------	------------	------------	---------

Correct Answer

Decoder

165) The process of converting analog signal into digital is:

a) Modulation	b) Demodulation	c) Communication	d) None of these
---------------	-----------------	------------------	------------------

Correct Answer

Demodulation

166) The term that refer to all input, output and secondary storage device is:

a) Peripheral	b) Central	c) Attached	d) Network
---------------	------------	-------------	------------

Correct Answer

Peripheral

167) How a virus reaches from one computer to another?

a) Data is exchanged between computer	b) Exchanged of display screen	c) Exchange of keyboard	d) Exchnaged of printer
---------------------------------------	--------------------------------	-------------------------	-------------------------

Correct Answer

Data is exchanged between computer

168) Virus are transfer from one computer to another due to:

a) Exchange data	b) Exchange of display screen	c) Dust in room	d) High temperature
------------------	-------------------------------	-----------------	---------------------

Correct Answer
Exchange data

169) Web pages are connected to one another using:

a) Hyperlink	b) HTTP	c) Internet	d) Multimedia
--------------	---------	-------------	---------------

Correct Answer
Hyperlink

170) Satellite is present in the space _____ above the earth:

a) 20000 miles	b) 15000 miles	c) 25000 miles	d) 22300 miles
----------------	----------------	----------------	----------------

Correct Answer
22300 miles

171) Which is popular full word processor:

a) MS Word	b) Spread Sheet	c) Word Pad	d) Notepad
------------	-----------------	-------------	------------

Correct Answer
MS Word

172) Which is not include the document management system?

a) Word-processing	b) Desktop publishing	c) Re-prographic	d) None of these
--------------------	-----------------------	------------------	------------------

Correct Answer
None of these

173) To communicate with input and output device, instruction is used:

a) Logical instructions	b) Arithmetic instructions	c) I/O instructions	d) None of these
-------------------------	----------------------------	---------------------	------------------

Correct Answer
I/O instructions

174) Microwave transmission, coaxial cables and fiber optics are example of:

a) Modems	b) Gateway	c) Ring network	d) Communication links
-----------	------------	-----------------	------------------------

Correct Answer
Communication links

175) Transmission of data character by character is:

a) Asynchronous	b) Synchronous	c) Simplex	d) Serial
-----------------	----------------	------------	-----------

Correct Answer
Synchronous

176) Type of ROM which is once programmable:

a) PROM	b) EPROM	c) EEPROM	d) RAM
---------	----------	-----------	--------

Correct Answer
PROM

177) OSI stands for:

a) Open system interconnection	b) Open system international	c) Open small internet	d) Open system interlink
--------------------------------	------------------------------	------------------------	--------------------------

Correct Answer
Open system interconnection

178) The processing of instructions is given by CU is the process, which is called:

a) Data fetch	b) Instruction fetch	c) Decode	d) Execute
---------------	----------------------	-----------	------------

Correct Answer
Execute

179) The actual working area in Microsoft Excel is:

a) Workbook	b) Worksheet	c) Spreadsheet	d) Note sheet
-------------	--------------	----------------	---------------

Correct Answer
Worksheet

180) Which of the following is not leading search engine?

a) Google	b) Excite	c) Yahoo	d) Netscape navigator
-----------	-----------	----------	-----------------------

Correct Answer
Netscape navigator

181) Data and program not used by the computer are stored in:

a) Secondary storage	b) Cache	c) Primary storage	d) Printer
----------------------	----------	--------------------	------------

Correct Answer
Secondary storage

182) Add new hardware option exists in:

a) Main Menu	b) Status Bar	c) Taskbar	d) Control Pnel
--------------	---------------	------------	-----------------

Correct Answer
Control Pnel

183) Which of the following coding scheme uses 4-bits codes:

a) ASCII	b) EBCDIC	c) BCD	d) Unicode
----------	-----------	--------	------------

Correct Answer
BCD

184) A bit can represent how many different values?

a) 0	b) 1	c) 2	d) 3
------	------	------	------

Correct Answer
2

185) Communication mode is:

a) LAN	b) Internet	c) Simplex	d) ASCII
--------	-------------	------------	----------

Correct Answer
Simplex

186) The chart, graph, picture and free hand drawing are examples of:

a) Image data	b) Audio data	c) Numeric data	d) Text data
---------------	---------------	-----------------	--------------

Correct Answer
Image data

187) The device or computer which transmits data is:

a) Sender	b) Receiver	c) Transformer	d) Transistor
-----------	-------------	----------------	---------------

Correct Answer

Sender

188) The _____ are continuous electrical signals in the form of wave:

a) Analog signals	b) Digital signals	c) Frequent signals	d) None of these
-------------------	--------------------	---------------------	------------------

Correct Answer

Analog signals

189) The cell of memory are logically organized into group of:

a) 8 bits	b) 5 bits	c) 12 bits	d) 4 bits
-----------	-----------	------------	-----------

Correct Answer

8 bits

190) Under MS-DOS a user communicates with operating system by issuing:

a) Command	b) Instructions	c) Routines	d) Procedure
------------	-----------------	-------------	--------------

Correct Answer

Command

191) The ITU was formerly known as:

a) CCITT	b) ISO	c) IBM	d) SNA
----------	--------	--------	--------

Correct Answer

CCITT

192) The extension of a executable file is:

a) .xl	b) .doc	c) .ext	d) .exe
--------	---------	---------	---------

Correct Answer

.exe

193) _____ is not to find information on World Wide Web:

a) Web browser	b) Search engine	c) Website	d) Web server
----------------	------------------	------------	---------------

Correct Answer

Website

194) CBT software is used in:

a) Education	b) Forecasting	c) Manufacturing	d) Electronic shopping
--------------	----------------	------------------	------------------------

Correct Answer

Education

195) Which one is not a virus?

a) Trojan horse	b) Logic bomb	c) McAfee	d) Redlof
-----------------	---------------	-----------	-----------

Correct Answer

McAfee

196) Which of the following keys is used to cancel an operation?

a) Arrow	b) Caps Lock	c) Num Lock	d) Esc
----------	--------------	-------------	--------

Correct Answer

Esc

197) How many parts there are in CPU?

a) 2	b) 3	c) 4	d) 5
------	------	------	------

Correct Answer

2

198) Copy data from internet to computer is called:

a) Uploading	b) Downloading	c) Transferring	d) None of these
--------------	----------------	-----------------	------------------

Correct Answer

Downloading

199) The cell address B4,C4,D4 and E4 can be shown as:

a) B:E	b) B:4	c) B4:E4	d) 4B:4E
--------	--------	----------	----------

Correct Answer

B4:E4

200) The primary and main memory of computer is:

a) ROM	b) Cache	c) RAM	d) Hard disk
--------	----------	--------	--------------

Correct Answer

RAM

201) Which of the following is the types of RAM:

a) SRAM	b) DRAM	c) Both a & b	d) None of these
---------	---------	---------------	------------------

Correct Answer

Both a & b

202) Which of the following is a chart type?

a) Peach tree	b) Pie	c) Apple pie	d) Dummy
---------------	--------	--------------	----------

Correct Answer

Pie

203) How many types of network communication device?

a) 2	b) 4	c) 6	d) 8
------	------	------	------

Correct Answer

4

204) The music and speech represent data:

a) Image	b) Text	c) Numeric	d) Audio
----------	---------	------------	----------

Correct Answer

Audio

205) A collection of raw, facts and figures is called:

a) Data	b) Information	c) Processing	d) Computing
---------	----------------	---------------	--------------

Correct Answer

Data

206) Unicode is a:

a) 16-bit code	b) 32-bit code	c) 64-bit code	d) 132-bit code
----------------	----------------	----------------	-----------------

Correct Answer

16-bit code

207) A collection of related web pages is called:

a) Uploading b) Website c) Downloading d) Linking

Correct Answer

Website

208) bps is short for:

a) Bytes per second	b) Band per second	c) Bits per second	d) bytes permanent second
---------------------	--------------------	--------------------	---------------------------

Correct Answer

Bits per second

209) The process of finding and correcting programming errors is known as:

a) Error trapping	b) Hammering	c) Debugging	d) Fixing
-------------------	--------------	--------------	-----------

Correct Answer

Debugging

210) The device which converts data into analog signal before transmission over medium.

a) Medium	b) Encoder	c) Decoder	d) Source
-----------	------------	------------	-----------

Correct Answer

Encoder

211) Which of the following is not an example of e-commerce?

a) Electronic banking	b) Electronic shopping	c) Online chatting	d) Online education
-----------------------	------------------------	--------------------	---------------------

Correct Answer

Online chatting

212) Types of partitions are:

a) 2	b) 4	c) 6	d) 8
------	------	------	------

Correct Answer

2

213) The output of printer is called:

a) Hard copy	b) Graphics	c) Multimedia	d) Soft copy
--------------	-------------	---------------	--------------

Correct Answer

Hard copy

214) List of documents waiting to be printed is called:

a) Print list	b) Print stack	c) Print queue	d) Print line
---------------	----------------	----------------	---------------

Correct Answer

Print queue

215) Which of the following is a valid formula in MS-Excel?

a) =B7C7	b) =9B+10C	c) C7=D7	d) A2+B2
----------	------------	----------	----------

Correct Answer

=9B+10C

216) A virus replicated itself is called:

a) Bug	b) Worm	c) Vaccine	d) Bomb
--------	---------	------------	---------

Correct Answer

Worm

217) The communication channels can be divided into:

a) Two types	b) Four types	c) Seven types	d) None of these
--------------	---------------	----------------	------------------

Correct Answer

Two types

218) An important characteristic of ROM is:

a) Temporary	b) Write only	c) Volatile	d) Non volatile
--------------	---------------	-------------	-----------------

Correct Answer

Non volatile

219) Standard IP Address is composed of a total of:

a) 4 bits	b) 16 bits	c) 32 bits	d) 256 bits
-----------	------------	------------	-------------

Correct Answer

32 bits

220) The standard protocol for the internet is:

a) TCP	b) IP address	c) IP Protocol	d) TCP/IP
--------	---------------	----------------	-----------

Correct Answer

TCP/IP

221) Binary number consists of :

a) 2 digits	b) 3 digits	c) 8 digits	d) 16 digits
-------------	-------------	-------------	--------------

Correct Answer

2 digits

222) A bus that transfer data between the central processor and memory is known as:

a) I/O bus	b) CPU	c) Processor bus	d) Data bus
------------	--------	------------------	-------------

Correct Answer

Data bus

223) A small image that represents a program, instruction or a file is called:

a) Mune	b) GUI	c) Comand Language	d) Icon
---------	--------	--------------------	---------

Correct Answer

Icon

224) MICR stands for:

a) Magnetic Ink Character Reader	b) Magnetic Ink Code Reader	c) Magnetic Ink Character Recorder	d) Magnetic Ink Character Recognition
----------------------------------	-----------------------------	------------------------------------	---------------------------------------

Correct Answer

Magnetic Ink Character Reader

225) Symbol that separates parts in email address:

a) \$	b) #	c) @	d) ^
-------	------	------	------

Correct Answer

@

226) Which type of diagram shows how information flows through a system?

a) Logical flowchart	b) Gantt chart	c) DFD	d) Decision table
----------------------	----------------	--------	-------------------

Correct Answer

DFD

227) The instruction that performs comparison between data:

a) I/O instruction	b) Logical instruction	c) Arithmetic instruction	d) None of these
--------------------	------------------------	---------------------------	------------------

Correct Answer

Logical instruction

228) MS Excel contain following types of chart:

a) Pie chart	b) Bar chart	c) Line chart	d) All of above
--------------	--------------	---------------	-----------------

Correct Answer

All of above

229) Which protocol is used to access web pages on World Wide Web?

a) TCP/IP	b) Gopher	c) HTTP	d) HTML
-----------	-----------	---------	---------

Correct Answer

HTTP

230) Which of the following is related to business:

a) Marketing	b) Banks	c) Stock exchange	d) All of these
--------------	----------	-------------------	-----------------

Correct Answer

All of these

231) Satellite is an example of:

a) Un-bounded media	b) Guided media	c) TV channels	d) None of these
---------------------	-----------------	----------------	------------------

Correct Answer

Un-bounded media

232) Most application of robotics are in which area?

a) Cooking	b) Manufacturing	c) Teaching	d) Farming
------------	------------------	-------------	------------

Correct Answer

Manufacturing

233) Which of the following is the most devastating loss to a company:

a) Loss of hardware	b) Loss of data	c) Loss of RAM	d) Loss of printouts
---------------------	-----------------	----------------	----------------------

Correct Answer

Loss of data

234) Operating system can perform following:

a) Memory management	b) Execute Programs	c) Data Storage	d) All of them
----------------------	---------------------	-----------------	----------------

Correct Answer
All of them

235) GUI stands for:

a) Global User Interface	b) Graphical User Interface	c) Graphical User Internet	d) None of these
--------------------------	-----------------------------	----------------------------	------------------

Correct Answer
Graphical User Interface

236) The extension of an executable file is:

a) .xls	b) .doc	c) .ext	d) .exe
---------	---------	---------	---------

Correct Answer
.exe

237) Computer consists of:

a) Hardware	b) Software	c) Both a & b	d) None of these
-------------	-------------	---------------	------------------

Correct Answer
Both a & b

238) The function that returns the total number of non-empty cells:

a) =sum(A1:B5)	b) =count(A5:A10)	c) min(A10:A20)	d) =minimum(A10:A20)
----------------	-------------------	-----------------	----------------------

Correct Answer
=count(A5:A10)

239) The ability of an operating system to control the activities of multiple programs at the same time is called:

a) Multi-tasking	b) Multi-processing	c) Multi-operating	d) Multi-paging
------------------	---------------------	--------------------	-----------------

Correct Answer
Multi-tasking

240) The term that define the size and style of a type face is:

a) Point	b) Font	c) Character	d) Size
----------	---------	--------------	---------

Correct Answer
Font

241) EBCDIC is _____ bit code:

a) 4-bit	b) 6-bit	c) 7-bit	d) 8-bit
----------	----------	----------	----------

Correct Answer
8-bit

242) Which component of CPU is responsible for deciding which operation to be performed by CPU:

a) ALU	b) CU	c) Register	d) None of these
--------	-------	-------------	------------------

Correct Answer
CU

243) Which one connects two similar network segments:

a) Router	b) Bridge	c) Gateway	d) Node
-----------	-----------	------------	---------

Correct Answer

Bridge

244) Which is not a network communication device?

a) Router	b) Hub	c) LAN	d) NIC
-----------	--------	--------	--------

Correct Answer

LAN

245) Many banks provides the facility of:

a) CAD	b) CAM	c) ATM	d) CBT
--------	--------	--------	--------

Correct Answer

ATM

246) Each computer on a network is called:

a) Bus	b) Terminator	c) Node	d) Connection
--------	---------------	---------	---------------

Correct Answer

Node

247) Assebler is used in _____ language:

a) Basic	b) C++	c) Assembly	d) Java
----------	--------	-------------	---------

Correct Answer

Assembly

248) The _____ is a physical path over which a message travels:

a) Protocol	b) Medium	c) Signal	d) All of these
-------------	-----------	-----------	-----------------

Correct Answer

Medium

249) What layer of OSI model does Data compression?

a) Network	b) Presentation	c) Data link	d) Physical
------------	-----------------	--------------	-------------

Correct Answer

Presentation

250) Capacity of RAM can be:

a) 256 MB	b) 512 MB	c) 1 GB	d) All of above
-----------	-----------	---------	-----------------

Correct Answer

All of above
